***Identity and Access Management is a necessary part of your information technology infrastructure.***

*Introducing a special opportunity to acquire services from one of the most reliable and experienced implementers in the market to initiate an Identity and Access Management environment for your organization.*

### What’s in the Oracle/Mycroft Identity and Access Management Bundle?

- World Class Software: Oracle Identity Management Suite for 1000 internal users, and 5000 external users.
- Fast-Tracked, Experienced Installation: In 2 months, Mycroft delivers an identity management solution using Oracle Identity Manager to manage Active Directory, LDAP and a RDBMS.
- Support and Management of the Environment: Problems in your system will generate an alert to Mycroft’s Network Operations Center, where our management services team will attend to the error and provide you with support.

### What does it cost?\*

- Implementation Services: \$ 60,000
- Monthly Support/Management (Post-implementation): \$ 10,000 per month
- Configuration Management Services: no charge for first 30 days

\*Promotional Pricing ends May 2009.

### Why purchase Mycroft’s Bundle?

Others may offer a “quick start” implementation – few can do so with the proven success of Mycroft; and fewer, if any, offer the support of a 24x7 full time delivery organization and world-class delivery facility. This offer provides a rapid implementation, establishing a full scale identity management solution, and provides on-going support, which eliminates the expense of on-going systems management.

- Strategy, Advisory Services, Consulting Services
- Base Build (Pre-Configured) Implementations
- Customized Implementations as Required
- Custom Software Development – Connectors, Plug-ins, Extensions
- Configuration and Application Support Services
- Additional Bundles Available (please ask your Mycroft Sales Executive)

**Oracle Identity and Access Management Suite includes:**

**Oracle Identity Manager** is a highly flexible and scalable enterprise identity management system that can centrally control user accounts and access privileges within enterprise IT resources. It provides the functionalities of identity and role administration, approval and request management, policy-based entitlement management, technology integration, and audit and compliance automation.

**Oracle Access Manager** is a state of the art solution for centralized identity and access control. Oracle Access Manager delivers the functionalities of web single sign-on, access policy creation and enforcement, user self registration and self service, delegated administration, password management, and reporting and auditing.

**Oracle Identity Federation** is an industry-leading federation solution providing a self contained and flexible multi-protocol federation server deployable with existing identity and access management systems.

**Oracle Internet Directory** is an LDAP v3 service that combines mission critical strength of Oracle's database technology with the flexibility and compatibility of the LDAP v3 standard.

**Oracle Virtual Directory** allows you to rapidly deploy secure directory enable applications by providing a real-time, virtual view of identity data from any data-store including directories, databases and Web Services without synchronization.

**Oracle Role Manager** provides enterprise class role lifecycle management capabilities, helping strengthen regulatory compliance, and alleviating associated costs. It acts as the authoritative source for the relationships between business users, organizations, and entitlements, thus enabling automation of role based provisioning and access control across the IT infrastructure. This also provides enterprise applications rich role information enabling automation of business transactions for approval and routing.

**Note:**

Additional provisioning end points, interfaces and additional user licenses are available for an incremental cost: Post-Implementation Support minimum 12 months. This offer expires May 2009 and is available to First Time Oracle Identity and Access Management Customers.

**About Mycroft**
